

CALL FOR PAPERS
Fifth International Conference on
Formal Structures for Computation and Deduction (FSCD 2020)
June 29 – July 5, 2020, Paris, France

PROGRAM COMMITTEE CHAIR

Zena M. Ariola University of Oregon
fscd2020@easychair.org

PROGRAM COMMITTEE

M. Alpuente Technical Univ. of Valencia
S. Alves University of Porto
A. Bauer University of Ljubljana
M. P. Bonacina Università degli studi di Verona
P-L. Curien CNRS - Univ. of Paris Diderot
P. Dybjer Chalmers Univ. of Technology
U. De'Liguoro University of Torino
M. Fernández King's College London
M. Gaboardi Boston University
D. Ghica University of Birmingham
S. Ghilezan University of Novi Sad
J. Giesl RWTH Aachen University
S. Guerrini University of Paris 13
R. Harper Carnegie Mellon University
M. Hasegawa Kyoto University
N. Hirokawa JAIST
P. Johann Appalachian State University
O. Kammar University of Edinburgh
D. Kesner University of Paris Diderot
C. Kop Radboud University
O. Laurent CNRS - ENS Lyon
D. Licata Wesleyan University
A. Middeldorp University of Innsbruck
J. Mitchell Stanford University
K. Nakata SAP Postdam
M. Pagani University of Paris Diderot
E. Pimentel Fed. Univ. Rio Grande do Norte
F. van Raamsdonk VU Amsterdam
G. Rosu University of Illinois
A. Sabry Indiana University
A. Stump University of Iowa
P. Urzyczyn University of Warsaw
T. Uustalu Reykjavik University
S. Zdancewicz University of Pennsylvania

CONFERENCE CHAIR

Stefano Guerrini University of Paris 13

WORKSHOP CHAIR

Giulio Manzonetto University of Paris 13

PUBLICITY CHAIR

Sandra Alves University of Porto

SUBMISSION GUIDELINES Submissions can be made in two categories. Regular research papers are limited to 15 pages, excluding references. They must present original research which is unpublished and not submitted elsewhere. Proofs and other technical details that do not fit within the page limit can be submitted as an appendix (up to 5 pages). The appendix will be consulted at the discretion of the reviewers. Therefore, submissions must be self-contained within the respective page limit; the additional material should not be necessary to assess the merits of a submission. System descriptions are limited to 15 pages, excluding references. They must present new software tools, or significantly new versions of such tools, in which FSCD topics play an important role. An archive of the code with instructions on how to install and run the tool must be submitted. In addition, a webpage where the system can be experimented with should be provided. Complete instructions on submitting a paper can be found on the conference web site.

IMPORTANT DATES All deadlines are midnight anywhere-on-earth (AoE); late submissions will not be considered.

Abstract: February 6, 2020 **Rebuttal:** March 27-29, 2020 **Final version:** April 27, 2020
Submission: February 9, 2020 **Notification:** April 13, 2020

BEST PAPER AWARD BY JUNIOR RESEARCHERS The program committee will select a paper in which at least one author is a junior researcher, i.e. either a student or whose PhD award date is less than three years from the first day of the meeting. Other authors should declare to the PC Chair that at least 50% of contribution is made by the junior researcher(s).

FSCD (<http://fscdconference.org/>) covers all aspects of formal structures for computation and deduction from theoretical foundations to applications. Building on two communities, RTA (Rewriting Techniques and Applications) and TLCA (Typed Lambda Calculi and Applications), FSCD embraces their core topics and broadens their scope to closely related areas in logics, models of computation, semantics and verification in new challenging areas.

The suggested, but not exclusive, list of topics for submission is:

1. *Calculi*: Rewriting systems (string, term, higher-order, graph, conditional, modulo, infinitary, etc.); Lambda calculus; Logics (first-order, higher-order, equational, modal, linear, classical, constructive, etc.); Proof theory (natural deduction, sequent calculus, proof nets, etc.); Type theory and logical frameworks; Homotopy type theory; Quantum calculi.
2. *Methods in Computation and Deduction*: Type systems (polymorphism, dependent, recursive, intersection, session, etc.); Induction, coinduction; Matching, unification, completion, orderings; Strategies (normalization, completeness, etc.); Tree automata; Model building and model checking; Proof search and theorem proving; Constraint solving and decision procedures.
3. *Semantics*: Operational semantics and abstract machines; Game Semantics and applications; Domain theory and categorical models; Quantitative models (timing, probabilities, etc.); Quantum computation and emerging models in computation.
4. *Algorithmic Analysis and Transformations of Formal Systems*: Type Inference and type checking; Abstract Interpretation; Complexity analysis and implicit computational complexity; Checking termination, confluence, derivational complexity and related properties; Symbolic computation.
5. *Tools and Applications*: Programming and proof environments; Verification tools; Proof assistants and interactive theorem provers; Applications in industry; Applications of formal systems in other sciences.
6. *Semantics and Verification in new challenging areas*: Certification; Security; Blockchain protocols; Data Bases; Deep learning and machine learning algorithms; Planning.

PUBLICATION The proceedings will be published as an electronic volume in the Leibniz International Proceedings in Informatics (LIPIcs) of Schloss Dagstuhl. All LIPIcs proceedings are open access.

SPECIAL ISSUE Authors of selected papers will be invited to submit an extended version to a special issue of Logical Methods in Computer Science.
